WORK EXPERIENCE

SENIOR DEVELOPER, CURIX AG
BAAR, SWITZERLAND - 2023 - PRESENT

Responsible for integrating third-party APIs into the CuriX system, demonstrating successful integration with Dynatrace, CheckMK, and Azure. Accomplished the development of a microservice metric collector for Dynatrace, CheckMK, and Azure. Tasked with establishing and configuring the Azure and CheckMK environment within a Linux VM to ensure smooth access and integration. Installed and configured the essential PRTG Network Monitoring tool on a Windows Server VM to facilitate communication with the collector microservice. Worked closely with the inaugural members of the development team to meet project milestones.

FREELANCE SENIOR DEVELOPER, TRUSTIIN
ONTARIO, CANADA - 2022 - 2023

Developed a comprehensive application by employing front-end development (React/Redux) and back-end development (Java/Spring Boot). This encompassed the creation of new modules and the strategic integration of third-party libraries to augment functionality. Produced thorough documentation for future reference and implemented unit tests to validate functionality and meet requirements.

FREELANCE SENIOR DEVELOPER, RATEBOARD
TYROLL, AUSTRIA - 2021 - 2022

Enhanced application functionality by seamlessly integrating a new third-party hotel API, integrating hotelinx into the RateBoard System, and developing modules to augment overall capabilities. Implemented a more streamlined microservices architecture for improved efficiency. Additionally, authored comprehensive documentation for future reference and implemented unit tests to ensure functional and requirement validation.

REMOTE SENIOR FULLSTACK DEVELOPER, CASHARE AG
HÜNENBERG SWITZERLAND - 2017 - 2019

Led the creation of the microservices framework for the enterprise application, overseeing design and architecture. This involved initiating module-by-module development to break down the application into smaller, deployable units. My responsibilities included researching impact analyses and solution specifications. Integrated OAuth2 security into the microservices structure, ensuring a robust security framework. I analyzed issues, conducted thorough root cause analyses, and proposed effective solutions. Recognizing the need for streamlined development processes, I proposed efficient and procedural development approaches. Implemented unit tests for functional and requirement validation checks.

LEAD FULLSTACK DEVELOPER, YABBU
AMSTERDAM, NETHERLANDS - 2016 - 2017

Initiated the development process. Worked closely with the CEO to prioritize modules for bi-weekly sprint development, monitoring the progress of both local and remote team members. Systematically organized and assigned weekly deliverables for the team.
